Profile

- Results-driven **Full Stack Developer** with experience building scalable applications across fintech, HRMS, and AI domains.
- Proficient in **MERN stack, Python frameworks, and modern backend architectures**, with a strong focus on performance, security, and real-time systems.
- Experienced in **designing role-based systems, integrating payment gateways, and implementing real-time features** using socket.
- Skilled in translating Figma designs into **responsive, user-centric interfaces** using React and Tailwind CSS.

Experience

Software Developer | Feb, 2025 - Present

The Billions, Remote

- Developed and scaled **full-stack applications** across fintech, HRMS, and AI domains with **secure authentication and role-based access control**.
- Built **real-time features** including notifications, chat, and live updates using Socket.IO.
- Optimized backend performance with **efficient queries, caching, and automation pipelines**.
- Integrated **AI-powered features using LLMs** to improve data processing and reduce manual effort.
- Developed responsive UIs from Figma using **React and Tailwind**, ensuring clean and intuitive user experience.

Backend Developer Associate | Jul, 2023 - Oct, 2023

Trakky Techno Services Pvt Ltd, Ahmedabad, IN

- **Designed** and maintained Django backend, crafting URLs, ViewSets, serializers, and models.
- **Expertise** in SQLite database management for seamless data operations, ensuring application efficiency.

Projects

Total Liquor

[MERN, PostgreSQL, Finix, Socket.IO, AWS]

- **Developed** a full-stack **B2B liquor marketplace** connecting restaurants and bars with licensed stores for ordering and delivery.
- **Implemented secure Finix payment integration** with authorization-capture flow and automated split transfers.
- **Built a real-time order management system** using Socket.IO, enabling live status updates across multi-role dashboards.
- **Designed a dynamic pricing engine** with configurable margins and real-time updates based on admin controls.
- **Developed TABC compliance automation** including license verification, expiration tracking, and order restrictions.
- **Integrated AWS S3** for secure storage of product images and license documents using presigned URLs, improving scalability and access control.

Getways

[MERN, Stripe]

- **Developed** a fintech platform enabling **digital wallet management, gift card redemption, and multi-role access** (Player, Agent, Master Agent, Admin).
- **Implemented secure authentication and form validations** across frontend and backend to strengthen data integrity and prevent invalid transactions.
- **Optimized** backend queries and aggregation pipelines, significantly **reducing response time** and improving system performance.
- **Redesigned** the entire **Player and Admin UI** from scratch using **Figma prototypes**, enhancing usability and user experience.
- **Built a Reports module** with transaction analytics and visual graphs using **Chart.js**, empowering admins with real-time insights.
- **Integrated a custom chatbot** to assist users with recharges, wallet history, and FAQs, reducing dependency on manual support.

Winbid AI

[MERN, AI/LLMs, Puppeteer]

- **Researched** and integrated **RFP platforms (OpenGov, DemandStar, SAM.gov, Bonfire)** to automate data collection using APIs and Puppeteer.
- **Designed** and developed **RFP Discovery, Dashboard and Proposal Builder** to streamline workflows.
- **Built AI-powered proposal generation system that cut manual effort by 60%** using OpenAI, Gemini, and open-source LLMs (Llama, DeepSeek) with section-wise regeneration and improvement.
- **Automated document processing and formatting** (attachments, scope of work, logos, dynamic TOC) to generate professional DOCX proposals.
- **Deployed** application with **real-time progress tracking, cron jobs for RFP updates, and role-based access control**.

Education

B.E. Information Technology | Nov 2021 – Jun 2025

LJ University, Ahmedabad, IN

CGPA: 8.76

Skills

Frontend — React.js, Redux Toolkit, RTK Query, Tailwind CSS, Shadcn/UI, Bootstrap

Backend — Node.js, Express.js, FastAPI, Django, REST APIs, Socket.IO

Programming Languages — JavaScript, Python, C, J2SE, HTML, CSS

Databases — MongoDB, PostgreSQL, MySQL, SQLite, Redis

Tools & Others — Git, GitHub, AWS (S3), Stripe, Finix, Chart.js, Puppeteer, Cron Jobs, Real-time Systems
